

**Statement by Deputy Minister for Administration, Hon. Samuel F. Brown**

Presentation of Letters of Appointment and Induction Ceremony of Local Chiefs

Kakata City, Margibi County

September 5, 2025

Distinguished guests, honorable local officials, esteemed chiefs, elders, and fellow citizens:

It is with great honor that I join you today on behalf of the Ministry of Internal Affairs to present letters of appointment and preside over the induction of newly appointed local chiefs here in Kakata, Margibi County.

To our newly inducted chiefs, I extend my heartfelt congratulations. Your appointment is not only a mark of trust but also a call to serve with dignity, humility, and dedication. I urge each of you to carry out your duties with integrity and respect for the traditions and values of your people.

As traditional leaders, you are the custodians of our heritage and the bridge between the people and the government. I emphasize the importance of collaboration between traditional leadership and the County Authorities. Working hand in hand will strengthen governance at the grassroots level and ensure that development reaches every corner of our communities.

Let your leadership be a positive force that uplifts your communities. I call on you to be champions of peace and reconciliation, and to work diligently toward the peaceful settlement of boundary disputes and other local disagreements. Unity and cooperation are key to sustainable development and national cohesion.

In response to their appointments, the newly inducted chiefs extended their sincere gratitude to His Excellency President Joseph Nyuma Boakai and the Government of Liberia for the confidence placed in them to serve their people. They pledged to uphold the responsibilities entrusted to them and to promote peace, unity, and development across their various communities.

Once again, congratulations to all our newly appointed chiefs. May your service be marked by wisdom, fairness, and an unwavering commitment to the people you represent.

Thank you.
